

Trip Builder

manage fuel deliveries and
depot collections

Manage orders and deliveries from one platform

The Trip Builder add-on allows petroleum suppliers to easily manage all orders as well as all trips to clients and depots. Manage the entire sales process via MyGEOTAB. Allow admin to capture new orders, finance to verify payments, dispatchers to print bill of loading and drivers to delivery accordingly. Verify the quantity delivered with time-stamped arrival and departure.

Reporting and maintenance

Advanced reporting allows one to analyse the productivity of each tanker according to the quantity of petroleum delivered, the number of deliveries as well as the time spent active and inactive.

The Maintenance Cost Tracker add-on allows one to track all maintenance jobs done on each vehicle. The availability of such data further enables one to calculate profit per tanker and other productivity and efficiency calculations.

Geotab Open Platform for Telematics

Increase Productivity & Control Costs

- + Improve asset utilization
- + Aggregate data for mixed assets
- + Increase labor productivity
- + Predictive maintenance for reduced downtime
- + Reduce repair costs

Improve Driver Safety

- + Risk & safety reports
- + In-vehicle, proactive coaching with customized messaging
- + Reduce accidents & days lost
- + Instant accident notifications
- + Monitor seat belt use

Manage Compliance

- + Improve worksite compliance
- + HOS - Working hours
- + DVIR (Vehicle inspections)
- + Electronic logs to reduce paperwork
- + Set rules and alerts to your policy

Expandability

- + IOX Technology
- + Open data integration with SDK
- + Monitor PTO
- + Asset tracking and monitoring
- + Mobile apps
- + Driver ID
- + In-vehicle camera integration

Reduce Fuel Costs & Increase Uptime

- + Improve routes for field services
- + Enhanced mapping
- + Improved fuel economy
- + Reduce idling and fuel spend
- + Receive engine diagnostics and alerts

Geotab GO7 Telematics Device

- + Fast GPS acquisition time
- + Captures rich, second-by-second data
- + Ultra-accurate engine diagnostics
- + High-quality recording

Do more with your data

- + IRIDIUM Satellite for Device Communication Outside of Cellular Network Coverage
- + Asset Tracking Application
- + GO TALK Live In-vehicle Verbal Coaching
- + Driver Identification with NFC technology
- + Geotab Drive Mobile App for DVIR, HOS & Driver ID
